Summary

Associate Product Manager with a Computer Science background, owning 15+ product initiatives across customer experience, logistics, and operations at a D2C health & wellness brand. Experienced in end-to-end product execution, from problem discovery and PRDs to technical integrations, UAT, and launch, with a focus on automation and operational efficiency. Also founded and scaled a global tech community of 10,000+ members, bringing a blend of technical depth, entrepreneurial ownership, and user-centric product thinking.

Experience

Associate Product Manager Feb 2026 – Present
Nutrabay (D2C health & wellness) *Gurugram, India*

- **Owned end-to-end redesign of failed-delivery (NDR) recovery:** diagnosed funnel drop-offs and launched automated WhatsApp, SMS, email and AI voice outreach, **cutting failed deliveries by 12%** and manual follow-up effort by **65%**.
- **Launched AI-powered customer support across web and app,** automating **55% of eligible interactions** and **reducing the order-to-ticket ratio by 22%** through automated query resolution.
- **Unified support operations into a single CRM workspace** by integrating OMS, shipment tracking and telephony; redesigned ticket routing and escalation flows, **saving 24+ manual hours per week** across Support and Logistics.
- **Built company-wide operational intelligence:** drove dashboards across shipment visibility, inventory, warehouse operations, NDR recovery and support, giving leadership a live view of KPIs and operational bottlenecks.
- **Drove 15+ cross-functional product initiatives** with Engineering, Logistics, Support and Operations, owning discovery, PRDs, prioritisation, stakeholder alignment, UAT and launch; shipped customer consent and data-privacy controls aligned with India's DPDP Act.

Engineering Intern Sep 2024 – Apr 2025
Intervue.io *Remote*

- **Designed 20 evaluation rubrics across 5 engineering domains,** turning ambiguous assessment requirements into structured frameworks that improved scoring consistency.
- **Automated evaluation workflows** with Google Apps Script and JavaScript, removing repetitive data entry and **saving ∼10 team hours per week**.

Product Growth Intern May 2024 – Jul 2024
SkillArena *Noida, Uttar Pradesh*

- **Drove user acquisition across 30 colleges,** bringing in **4,000 users** and running activation experiments that contributed to **101% month-over-month growth**.
- **Analysed onboarding feedback from 500+ users** to pinpoint first-time-user friction and prioritise improvements across the acquisition-to-activation funnel.

Projects

WorkOS | ***Personal PM Operating System (React)*** GitHub
Personal Project

- **Designed and built a PM operating system** unifying tasks, projects, meeting notes, blockers, approvals and follow-ups in one workspace; replaced fragmented tools and is used daily.
- **Built an end-to-end execution workflow** linking daily, weekly and monthly priorities to projects, with tracking for task status, dependencies and pending work.

Leadership

Founder & Lead, Nodebrew 2020 – 2026
Global technology community *Delhi, India*

- **Grew the community from 0 to 10,000+ members across 36 countries** through defined growth channels, programs and partnerships.
- **Led a 35-member team** to deliver **3 hackathons, 5 mentorship cohorts and 20+ bootcamps**; **raised $30,000 from 19 sponsors,** including Jane Street, Balsamiq and Linode.
